

“User Friendly” EMDR Training English taught by Dr. Gary Quinn

Unique training Revised Negative & Positive Cognition List

EMDR is a comprehensive, integrative psychotherapy that addresses the experiential contributors of a wide range of pathologies. It attends to the past experiences that have set the groundwork for pathology, the current situations that trigger dysfunctional emotions, beliefs and sensations, and the positive experience needed to enhance future adaptive behaviors and mental health. EMDR has a broad base of published case reports and controlled research that supports it as an empirically validated treatment of trauma, and it has been found to be effective in Anxiety Disorders, Depressive Disorders, and many other disorders.

This training course is open to mental health professionals.

Dr. Gary Quinn was personally trained and certified by Dr. Francine Shapiro, the developer of EMDR. He is a worldwide Trainer of Trainers (Israel, Europe, Asia, USA & New Zealand) and is the Director of The EMDR Institute of Israel— www.emdr-israel.org.

He has innovated two unique stabilization techniques that are used around the world:
ISP® Immediate Stabilization Procedure after man-made, natural disasters and trauma.
SCP-C Self Care Procedure for Coronavirus for future anxieties and fears.

The EMDR training course consists of lectures, demonstrations, and video tapes. EMDR training has a highly interactive component to allow participants to experience both roles as therapist and client.
